Notes:
[1] Conversion of NO_x to NO_2 using the Ozone Limiting Method and hourly concentrations of NO_2 and ozone. The ambient background concentrations measured at local monitoring stations are not added directly to the 1-hour and 24-hour modelled concentrations without background.

Appendix C.3: Percent Change in Maximum Predicted Concentrations from 2041 No-Build to Build with Background

[1] Conversion of NOx to NO_2 using the Ozone Limiting Method.
[2] Red cells represent an increase in concentration from the No-Build to Build scenario.
[3] Green cells represent a decrease in concentration from the No-Build to Build scenario.
[4] Grey cells represent 0% change from the No-Build to Build scenario.

Appendix C.4: Maximum Predicted Concentrations from 2051 No-Build Scenario with Background

Appendix C.4: Maximum Predicted Concentrations (µg/m³), 2051 No-Build Scenario, With 90th Percentile Ambient Background

RWDI #1301992A

Highway 413
GTA West
